SUMMARY

Engineering and computer science student with strong analytical and problem-solving skills, and experience in data analysis and visualisation. Passionate about applying technology to tackle problems in the resources and utilities sectors, particularly in automation and renewable energy.

TECHNICAL SKILLS

- Programming languages: Python, Java, C, SQL, MATLAB
- Electronic circuit simulation and design: LTspice, VHDL
- Data analysis and automation: Excel, Power BI, Power Apps

EDUCATION

Bachelor of Engineering (Honours) & Bachelor of Science **2023–Expected Dec 2027**
The University of Western Australia

- Combined degree majoring in Electrical and Electronic Engineering and Computer Science
- GPA: 6.893/7.000, WAM: 88.214%
- Faculty commendation for excellence: 96% in Computational Thinking with Python (2023)

Western Australian Certificate of Education **2017–2022**
Willetton Senior High School

- ATAR of 99.55
- First violin leader in string ensemble

COURSEWORK PROJECTS

Uni calendar web app (Agile Web Development) **Mar–May 2026**

- Developed a Flask web application for tracking university schedules and sharing availability with friends.
- Led database design and backend implementation.

WORK EXPERIENCE

Controls Engineer Intern **Nov 2025–Present**
Rio Tinto Iron Ore

- Performed Python data analysis of employee rosters.
- Built automated reports and business applications to track workforce and fleet operations.
